

SPEED PLATE®

Speed Plate® U.S. Patent Number 6,145,262 and patent pending

You've asked for it and now we've got it... Greenstreak is proud to present our new **Speed Plate® alignment tool!**

1/4" Speed Plate® sleeve alignment tool shown

This tool takes the guess work out of properly placing Speed Plate® sleeves on form boards prior to the concrete pour. By selecting the appropriate slab depth for your project, the Speed Plate alignment tool correctly locates the Speed Plate sleeve at the appropriate depth while ensuring proper dowel alignment, every time, which is a win-win for both contractor and owner.

The best part about this Speed Plate alignment tool is that it is free! Each box of Speed Plates will be shipped with an alignment tool included.
