

Improved with
LASER FORM² RELEASE

If you thought you liked Laser Form[®] before...you'll LOVE it now!!

Since its introduction in 1999, *Laser Form[®]* has provided contractors with a unique edge forming system to be used in conjunction with laser guided screed equipment. *Laser Form[®]* provides time and cost savings in preparation and setting of formwork, eliminates hand finishing at slab edges, and provides for a higher quality and flatter floor.

In an effort to further expedite the stripping and "clean-up" process, Greenstreak is proud to introduce **LASER FORM² RELEASE**. Specifically formulated and developed for *Laser Form[®]*, the agent acts as an effective bond breaker between *Laser Form[®]* and the poured concrete. **LASER FORM² RELEASE**, applied to the concrete contact surfaces prior to the pour, assures clean and simple stripping of *Laser Form[®]* from the slab edge.

If you are a current (or past) *Laser Form[®]* user and you have not tried the product with our **NEW LASER FORM² RELEASE**, try it **TODAY**, you will be glad you did!!

If you have never tried *Laser Form[®]*, try it with our **LASER FORM² RELEASE**, and realize time and labor savings along with producing higher quality, flatter floors!!

- Specifically formulated for use with *Laser Form[®]*
- Water based/non-hazardous
- Green tint allows visual assurance of coverage
- Available in 5-gallon pails
- Coverage: 1500 lineal feet of *Laser Form[®]* per 5-gallon pail.
